

# Gas Bottle Storage Carousel

## *Alabama Laser Technologies presents a better way to store your high pressure gas bottles*

The gas bottle storage carousel is an essential addition to any industry which uses high pressure gas bottles. After a bottle is loaded into the unit it can be easily rotated counterclockwise on the carousel to allow the addition of more bottles. The unit will hold up to five bottles.

### ***Safe storage of full high pressure gas bottles:***

- Eliminate the risk of bottles tipping over.
- Painted in bright "safety yellow" for ease of visibility.

### ***Better control of gas bottle inventory management:***

- Rotate inventory on a first-in-first-out basis.
- Segregate bottle inventory by type of gas.
- Help prevent overstocking or running out of bottles.

### ***Carousel can be easily loaded by one individual:***

- Front-loading ramp allows ease of bottle placement.
- Heavy-duty bearings for ease of bottle rotation.

*Safe storage of up to five gas bottles.*

*Front-load ramp and smooth rotating carousel for easy loading.*

*Ratchet mechanism allows for counterclockwise rotation only, ensuring first-in-first-out inventory.*

- Meets all OSHA requirements for:  
29.1910.101, 29.1910.253, 29.1926.350
- Patent pending
